

ARCHITECTURE · INTERIOR DESIGN · CONSTRUCTION

From Sketch to
Reality — We Build
Your *Dream Home*.

Every dream begins with a sketch.

TAMIL NADU · INDIA

Every masterpiece begins with *a single line.*

AARTCON is a design-led architecture, interior and construction studio based in Tamil Nadu. Architects, interior designers and builders work under one roof — so the home you imagine is the home we hand over. From the first pencil sketch to the final coat of light, one team carries your vision to reality. No hand-offs. No excuses. Just a dream, drawn, then built.

We take one promise seriously: honest design, honest materials, and honest craftsmanship — delivered on schedule and on budget, with weekly updates every step of the way.

— WHAT WE DO

Four disciplines. *One vision.*

01

Architecture

Contemporary residential architecture rooted in Tamil Nadu's climate — courtyards that breathe, light that moves, spaces that grow with your family. Concept design, 3D visualisation and statutory approvals.

02

Interior Design

Warm, layered interiors — materials, lighting, joinery and furniture curated to feel unmistakably yours. Full-home and modular interiors, kitchens, wardrobes, lighting and styling.

03

Construction

Our own engineers and site teams build what we design — transparent costing, a clear bill of quantities, in-house project management and weekly photo reports at every milestone.

04

Renovation

Breathing new life into loved spaces — from single rooms to complete home transformations. Structural strengthening, replanning, and full facade and interior makeovers.

From vision, to design, *to reality*

01

Listen

We begin with your life, not our portfolio — family rhythms, rituals, budget, plot and dreams. This conversation shapes everything.

02

Sketch

Concepts appear as hand sketches and massing studies. We iterate together until the idea feels inevitable.

03

Design

Full architectural drawings, 3D visualisations, interior schemes and material boards — approved by you before a single brick moves.

04

Engineer

Structural design, costing, approvals and a transparent bill of quantities. The budget you sign is the budget we keep.

05

Build

Our site teams execute with weekly photo reports and milestone reviews. Quality is checked, not assumed.

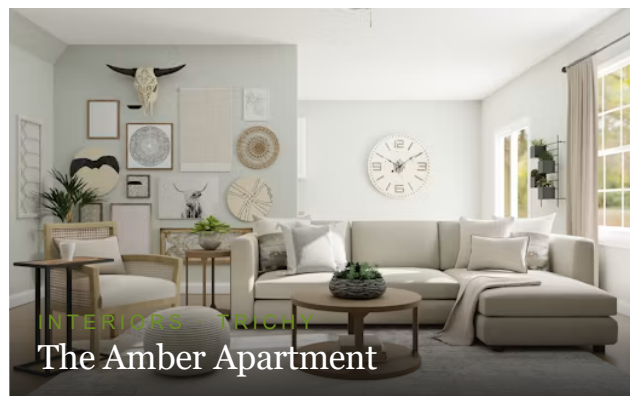

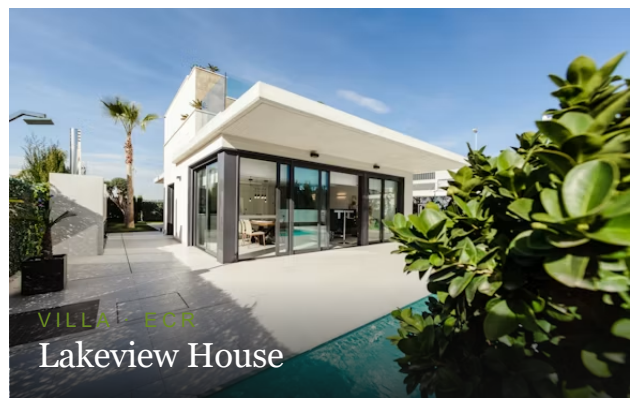

06

Handover

Styled, snag-free and ready to live in — with documentation, warranties and our continued care after you move in.

— SELECTED WORK

Built *dreams*

— BEGIN

Let's build your *dream home.*

Tell us about your plot and your vision. We reply within one working day — usually a friendly conversation over filter coffee.
